

# "SEE HAWAII FIRST,"

AN ADVERTISEMENT WRITTEN BY LORRIN A. THURSTON

## It Is a Trait of Human Nature

to think that distant things are better, more beautiful, or more wonderful than those near at home. This feeling has crystallized into the following:

### "A Prophet

is not without honor, save in his own country."

### "The Biggest Fish

is the one which is never caught."

### "Life's" Picture Gallery of Freaks"

recently contained a portrait of a "resident of Buffalo who has seen Niagara."

### A Local Illustration

of this trait is to think that it is necessary to go to the coast to get a change to a cooler climate.

### Now, as a Matter of Fact,

the most delightfully cool climate on God's footstool is to be

found on the uplands of the Hawaiian Islands. There are plenty of other places on the Islands where the climate is just as good; but:

### There Is No Place Like Kilauea

as a summer resort for Honolulu people, for the following reasons:

#### 1. It Has a Cool, Bracing Climate,

making it a pleasure to walk. At night the thermometer registers from 45 to 55 degrees, and at noon it is seldom over 75 degrees.

Several years ago I knew a party of ten who went to the volcano for a week. Among them was a girl on the verge of nervous prostration. The first day they walked around the crater—a distance of ten miles—and after dinner rode to the crater and back. The next morning the whole party was out bright and early for a walk to the fern forest.

#### 2. Kilauea Has a Marvelous Variety of Interesting Subjects.

Here are a few of them:

#### 1. The Volcano---

wonderful, interesting, dead or alive.

#### 2. Pit Craters---

a score of them—up to a thousand feet in depth—some with bare, jagged, steaming walls and sulphur banks—others filled with ferns, trees and verdure.

#### 3. Lava Trees and Moulds

some extending 15 feet above, some 15 below, ground—formed by lava congealing around an ancient forest.

#### 4. Fern Tree Forests---

miles of them—ferns up to 40 feet high.

#### 5. Koa Forest

trees six and eight feet in diameter and seventy feet high.

#### 6. Hawaiian Birds---

hundreds of them—brilliant colored and singing—an almost unknown sight elsewhere.

## Says the Hilo Board of Trade

And all these are within from Ten Minutes to Two Hours Easy Walk of the Volcano House

This is Only a Beginning of what there is to see on Hawaii.

### There Are Railroad Trips,

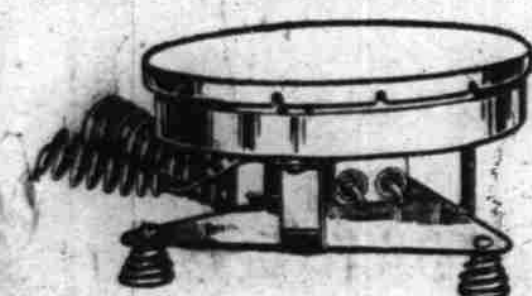

auto trips, horseback trips; trips long and trips short; trips along the ocean and trips into the mountains; trips into the jungle and trips on the lava flows; trips suited to any purse and any time schedule.

### We Want You

to come to Hawaii and let us prove to you that every word in this ad is true—and then some.

We also do all classes of house and store wiring and repair anything.

## IMPORTED BEEF WILL BE WATCHED

Beef from Australia passing through this port in liners operated by the Oceanic and Canadian-Australasian companies is to be watched and given a careful inspection before leaving the antipodes, according to a decision now said to have been reached but a few days ago.

By the Oceanic liner Ventura, due to arrive here from San Francisco on Monday morning, is said to be a representative of the United States Bureau of Animal Industry, who will spend some time in the several meat exporting ports on the Australian continent. The placing of meats on the free list through the provisions in the new Underwood tariff bill, combined with the marked decrease in the supply of cattle on the mainland, is said to have led the department to the belief that Australia at least will continue to ship beef to the United States in constantly increasing quantities.

The Oceanic liner Sonoma, now en route from Sydney to Honolulu and San Francisco, is reported to have several hundred thousand pounds of chilled beef and meats for discharge at Honolulu. It has only been a few weeks ago that a local firm began the importation of frozen meat from New Zealand and this product has been received here through Canadian-Australasian vessels. For many months Honolulu and the islands has been a market for meat from the colonies. The result of the federal inspection is believed will be watched with more than passing interest by local parties now engaged in the business.

## OVER-NIGHT FEDERAL WIRELESS To the Advertiser

Relief from the heat wave which has continued uninterruptedly throughout the Middle West for the past six days came today with cloudy weather. A rainfall is expected before night.

Thirty-eight deaths within the last twenty-four hours, with reports of infant mortalities coming in hourly, occurred in Chicago.

Dispatches received today from other cities show fifty deaths in the Middle West yesterday. Mad dogs added to the terrors of the heat wave, twenty persons having been bitten in Chicago alone. Reports received today indicate that at least one hundred persons have died as a result of the heat wave.

President Wilson left today for a three days' "rest cruise" on the yacht Mayflower.

The activities of the senate lobby investigation committee took a new turn yesterday when it was decided to direct the inquiry toward the operations of alleged paid news bureaus. The charge has been made that interests which will be affected by the proposed Underwood bill have paid for the services of news distributing

agencies in Washington in the hope of creating sentiment against proposed tariff reductions. It is also claimed that the investigation will show that well organized news agencies here have been maintained by representatives of different industries now gathered here.

Patrolmen James Hayden and Samuel Orr were picked out by the bunco men from a gathering of twenty San Francisco patrolmen, bailiffs and detectives summoned to the office of the chief of police today. They are charged with having accepted graft money.

They were immediately stripped of their badges and ordered suspended pending hearings before the police commission.

This now makes eight additional patrolmen named by Italian swindlers as having given protection to the operations of the bunco ring.

Harry M. Swartz, for ten years a corporal in the marine corps of California who fled to Honolulu after the alleged passing of a bogus check for \$512.50 on the Wells Fargo Nevada Bank has arrived in San Francisco in charge of Detective Dave Murphy on the steamship Honolulu this morning. He was booked at the city prison to await action by the police court.

The house judiciary committee today unanimously decided to transmit to the house tomorrow all correspondence and papers of the department of justice relating to the (Cammetti) Diggs "white slave" and the Western Fuel Company cases, with the exception of grand jury evidence.

The committee's report will include a resolution offered by Representative Kahn of California for an investigation of Attorney General McReynolds' action in ordering postponement of these cases.

John J. Nolan, San Francisco's labor congressman, jumped into the middle of the commotion stirred up in Washington by the corrupt lobby charges of Martin Mulhall when he introduced in the house a resolution requiring the production before a congressional committee of all books, records and office documents of the National Manufacturers' Association, for which Mulhall charges he worked for years.

"We propose that this association, which was maintained to crush the labor movement by the power of organized capital, shall be forced to tell how it conducted the fight," Mulhall's charges surprised no one in the labor world.

The discovery of a suffragette "murder plot," which hitherto has been known only to members of the home office, is announced in London today by the Daily Express. It is alleged the militant plan to avenge the death of any militant through self inflicted starvation upon members of the cabinet. "Should one of the militants die," the publication says, "while under sentence, the life of no member of the cabinet would be safe and the lives of two prominent ministers would be in the greatest jeopardy."

Twelve officials of the General Confederation of Labor were arrested in Paris today on the charge of inciting soldiers to disobedience and desertion. The police recently

raided the headquarters of the labor leaders and confiscated many books and papers.

"A tennis genius" is the description of Maurice McLaughlin, the Californian, in the papers of London today, all of which declare his service is wonderful. It is generally predicted that the Californian will win the championship of all England.

Much interest is being taken in the young Californian since it is now assured that he will meet Stanley Doust, the Australian champion, who today defeated Oscar Kreutz, the German champion.

Another note on the California alien land law arrived by cable today from Japan. The Japanese embassy at once began the work of preparing it for presentation to Secretary Bryan.

Answering critics, before the Tokio Bankers' Club last night, that Japan

was insufficiently redeeming its foreign debt of one billion, four million yen, the minister of finance, Baron Takahashi, yesterday admitted that the size of the indebtedness was a source of some apprehension, but no cause for alarm.

### LATEST JAPAN NEWS

TOKIO, June 30.—(Special to the Hawaii Shippo).—Prince Katsura, who has been ill at his country villa in Hayama, and who has been reported to be on the road to recovery, is again in a critical condition.

His serious illness is regarded with a great deal of regret, especially as he had been expected to assist in the big campaign to be inaugurated early in July by the Aikken-Doshikai, the new constitutional party which was organized by him a few months ago.

TOKIO, June 29.—(Special to the Hawaii Shippo).—Admiral Count S. Kabayama was today appointed president of the educational commission,

which was established by imperial ordinance on the thirteenth of last month, and Dr. Y. Okuda, present minister of the department of education, has been chosen vice-president. TOKIO, June 30.—(Special to the Hawaii Shippo).—Lieut. N. Oka, Sub-Lieutenant J. Takeda and Mr. Sakamoto, first three aviation graduates, were today awarded their diplomas. These three military aviators are the first to be granted a license in Japan. They have made some notable flights, in which the emperor himself has taken a great deal of interest since his recent illness.

## You Can't Be Happy With a Headache

Probably more pleasure is spoiled because of headaches than from any other reason.

When your head aches it not only makes you unhappy but it is very apt to interfere with the pleasure of anyone else around you. One can't be expected to be very cheerful and pleasant when one's head is simply splitting.

And there is no need of suffering. Keep a box of

## Stearns' Headache Wafers [Shac]

in the house when you are at home—carry it in your bag when you travel. That insures you against the annoyance of headaches—your own and other people's.

Stearns' Headache Wafers are as pure as they look, and the snow-white wafers certainly indicate purity in the highest degree. One dose cures, and leaves your head "clear as a bell."

It is so much better than any other kind that your own interest demands that you insist on STEARNS—the genuine.
